

FIRST MILK CALF COLOSTRUM POWDER

TOP QUALITY HIGH ENERGY COLOSTRUM FEED COMPLEMENTARY
- NUTRITION AND ENERGY FOR THE NEWBORN CALF

Precisely formulated to help provide vital primary nutritional support when maternal colostrum may be lacking, inadequate or of poor quality

RECOMMENDED USAGE

Mix FOUR level measures (total 200g) of First Milk powder into 500ml of warm water (below 50°C) and mix well. Make up to 1 Litre with more warm water and mix well again before use. After mixing, the product may be stored in a vacuum flask or a similar clean container for up to 24 hours. Feed 1 Litre of the mixed Calf Colostrum to each calf lacking sufficient quantity or quality of cow's colostrum. Particularly beneficial to orphans. The first feed should be as soon as possible, within the first 5 hours of birth.

Do not use water above 45-50°C. This is not a veterinary medicinal product. This is not a veterinary medicine which is subject to authorisation by the Irish Medicines Board.

Composition: Milk powder, Whey product, Yeast Product, Chicory Inulin, Dextrose and Whole Egg Powder.

Carbohydrates and milk fat for energy

Specification (per Litre):
